

Laser Treatment FAQs

What Is NeoSkin?

NeoSkin by Aerolase® is a new treatment option that allows for comprehensive rejuvenation of skin tone and texture, fine lines and wrinkles, veins and redness, and hyperpigmentation. Using unique 650 Microsecond Technology®, it gently delivers powerful energy for quick results that require no downtime afterwards. The laser energy stimulates the growth of collagen and can address any redness or brown spots. The treatment is customized to your skin's specific concerns, so whether you simply want to keep your skin glowing and prevent signs of aging or you have specific concerns you would like to address, NeoSkin can be tailored to you.

How Many Treatments are Needed?

The number of treatments needed varies from person to person depending on wants, needs, and the degree to which skin aging has occurred. For most patients, it is recommended that they undergo a treatment course of 4-6 sessions. Once the results you want have been achieved, subsequent sessions may be needed to maintain the results. Skin aging is a never ending process. Fortunately, the treatment can be performed whenever your skin needs rejuvenation.

What Does NeoSkin Rejuvenation Feel Like?

Most patients who have tried other lasers report that NeoSkin is much gentler and more pleasant. Typically, you will only feel a mild warming sensation on the skin when undergoing treatment. And unlike other rejuvenation treatments, NeoSkin has **no side-effects**, requires **no downtime**, and is **completely non-invasive**. This means you will not have prolonged redness and will be able to continue your normal daily activities right away.

*"My various skin problems had made me very self-conscious for a long time. My **NeoSkin** treatment was totally painless! Being an older person, I would never have expected the **change** that has been accomplished with my skin." - Mary, New York*

Is NeoSkin Right for Me?

NeoSkin by Aerolase® is proven to deliver excellent clinical results for all skin types. Outcomes may vary depending on your skin condition and various other factors. Your laser practitioner will review your skin's characteristics and medical history to determine the most appropriate and effective treatment for you.

Skin Rejuvenation

A rejuvenation treatment with NeoSkin is unique because it does so much for your skin. The laser uses a 1064nm wavelength which targets water, melanin, and hemoglobin (blood) in the skin. The combination of 650 Microsecond Technology® delivering the 1064nm wavelength is what allows for so many skin concerns to be addressed with a single device and in such an effective and gentle manner. The result is an improvement in your skin's overall quality, tone, and texture, leaving you with a youthful glow.

Address a Wide Range of Concerns:

Uneven tone, texture, and fine lines	Redness
Hyperpigmentation including age spots, and freckles	Spider Veins & Angiomas
Post-inflammatory hyperpigmentation and ingrown hairs	Scars
Unwanted hairs	

How Does NeoSkin Work?

- 1 The entire area (most commonly the face, neck, or chest) will be treated with laser light to globally stimulate collagen, which helps to minimize the appearance of fine lines, wrinkles, lax skin, and pores and improve overall tone & texture.
- 2 Individual concerns such as spider veins, broken blood vessels, or pigmented spots will then be addressed with a more focused treatment. The laser energy will be applied directly to these concerns, which will disappear over time.
